Personal Details

Citizenship: Filipino

Work Experience

Senior Fintech Fullstack Software Developer

Prostrive-Manila

September 2024 to Present

Leading the development of secure and scalable cryptocurrency payment integration solutions, focusing on bridging traditional financial systems with blockchain technology.

Key Responsibilities:

• Architect and develop full-stack applications using Next.js, React, and TypeScript

• Design and implement RESTful APIs using Node.js/Express for cryptocurrency payment processing

• Build and maintain database architecture using Prisma ORM and Supabase

• Manage several CI/CD pipelines, ensuring automated testing and deployment processes

• Design and maintain comprehensive unit testing strategies using Jest

• Integrate multiple cryptocurrency payment gateways and manage wallet implementations

• Implement robust security measures for handling financial transactions

• Lead technical decisions and mentor junior developers

• Collaborate with international clients and stakeholders across different time zones to gather requirements and provide technical solutions

Senior Software Engineer

ERNI Development Center Philippines Inc.

March 2024 to Present

• Developed feature-rich web applications using Angular, TypeScript, HTML5, and CSS3 for Frontend

• Utilized Git for version control and collaborated in an Agile environment

• Conducted code reviews and contributed to architectural decisions, improving overall system quality

• Worked cross-functionally with local teams to deliver projects on time and within quality standards

Software Engineer
Cambridge University Press & Assessment
June 2023 to January 2024

• Developed feature-rich web applications using Angular, TypeScript, HTML5, and CSS3 for frontend, C# for backend

• Implemented SOLID & DRY principles, enhancing code maintainability and efficiency

• Utilized Git for version control and collaborated in an Agile environment

• Conducted code reviews and contributed to architectural decisions, improving overall system quality

• Worked cross-functionally with global teams to deliver projects on time and within quality standards

Software Engineer
Macquarie Group
September 2022 to July 2023

• Collaborating with a versatile team in charge of developing and maintaining the Digital Bank's User Interface Applications.

• Converting UI/UX Design wireframes into actual code that generates virtual elements and components for the application using Angular.

• Utilizing technical knowledge to create new application features or improve current ones.

• Implementing DevOps best practices to maintain system reliability and the best product experience for customers.

User Interface Design Consultant(Contractual)
Team Recruit
July 2022 to August 2022

• Developing and conceptualizing a comprehensive UI/UX design strategy for the company.

• Producing high-quality UX design solutions through wireframes, visual and graphic designs, flow diagrams, storyboards, site maps, and prototypes.

• Designing UI elements and tools such as navigation menus, search boxes, tabs, and widgets for our digital assets.

• Testing UI elements such as CTAs, banners, page layouts, page designs, page flows, and target links for landing pages.

• Collaborating with the marketing team to ensure the creation and delivery of tailored experiences for the digital user.

• Providing advice and guidance on the implementation of UX research methodologies and testing activities in order to analyze and predict user behavior.

• Adhering to style standards on typography and graphic design.

Senior Associate Web Developer
AffinityX
June 2021 to August 2022

• Implement front-end web design based on the templates and specification guidelines provided by the client to develop

• Creation of exceptional websites based on client's requirements and specifications that will fully serve the customer's needs through design, complete content, and functional features.

• Design, develop, and maintain websites using agreed-upon CMS platforms, tag libraries, coding standards, and validation tests

• Maintaining project documentation, conceptualizing the development process with wireframing, and integrating usability based on the client's requirements

Full Stack Web Developer(Freelance)
KyroshTech Corporation

June 2018 to August 2020

• Develop full-stack web applications using web technologies such as HTML, JavaScript(Vue.js, Nuxt.js, Node.js, Express.js), and CSS(TailwindCSS, Bootstrap, etc.) providing a furnished, fast, and easy-to-use, and professional software products.

• Design application prototypes and graphic assets for websites, mobile applications, and web applications from the client's concept.

• Maintaining complex technology infrastructure and collaborating with other members using Agile Methodologies to implement features, fixes, and strategize for future builds.
